Qusai Al Tah

Assigned component: Order and Prescription Coordination, proposed model for team verification

This proposed component shows how orders contain requested medications and may be linked to prescriptions. It connects customer ordering functionality to prescription review. The team should confirm this specific individual contribution and diagram before treating it as a record of completed individual work.

Class	Responsibility	Related use cases
Customer	Customer profile, prescriptions and purchasing	UC01, UC06, UC13, UC14, UC15, UC21
Order	Purchase information, payment eligibility and status	UC03, UC13, UC14, UC15
OrderItem	Requested medication, quantity and price in an order	UC03, UC15
Medication	Medication identity, pricing and prescription requirement	UC04, UC05, UC08, UC16, UC17
Prescription	Uploaded prescription information and review status	UC01, UC06, UC11, UC12, UC24

Individual UML Class Diagram

Status: The allocated role and diagram in this section are proposed for confirmation because the supplied team report did not identify a separate completed individual diagram for this contributor.
